RESEARCH INTERESTS

I explore how people access, interpret, and utilize information, with the goal of designing equitable and user-centered systems and educational approaches.

- **Human Information Behavior**
- **AI in Information Literacy Education**
- **Information Retrieval Systems**
- **User-Centered Systems and Services**

EDUCATION

Washington State University — May 2026 (Expected)
B.S. in Computer Science

EXPERIENCE

Archival Digitization Assistant — 2025 – present
Manuscripts, Archives & Special Collections, Washington State University

Research Assistant to Professor Tingting Li — 2024 – present
Assistant Professor of Science Education, Washington State University

Backend Developer — 2022 – 2023
PCN, Seoul, Republic of Korea

PUBLICATIONS & CONFERENCES

[4] Jin, G., Li, T., **Lee, H. J.**, Xue, Y., He, P., Adesope, O. O., Dydasco, C. G., Sunday, O. J., & Nishida, K. (2026). *Using large language model to analyze chemistry undergraduate students' self-constructed concept maps.* Proposal submitted and accepted to American Educational Research Association (AERA). Los Angeles, CA.

[3] Li, T., Krajcik. J., Akgun, S., Midde, L., **Lee, H. J.**, & Wang, Z. (2025). *Designing 3D Assessments with Generative AI: A Hands-On Workshop for Elementary and Middle School Educators.* A Full day workshop accepted by National Science Teacher Association (NSTA) professional learning institute (PLI). Minneapolis, MN.

[2] He, P., Li, T., Midde, L., **Lee, H. J.**, & Wang, Z. (2025). *Designing 3D Assessments with Generative AI: A Hands-On Workshop for Elementary and Middle School Educators.* A 4-hour workshop accepted by Washington Science Teacher Association (WSTA). Tacoma, WA.

[1] **Lee, H. J.**, & Jung, Y. (2025). *Korean and Japanese Student Flows to the U.S. and International Research Collaboration Patterns.* Paper and oral presentation delivered at Japanese Modern Association of Korea (JMAK). Osaka, Japan.

Under Review

[1] Midde, L., **Lee, H. J.**, Wang, Z., & Li, T. *Toward Development: From Customizing Classroom Assessments with ADAPT-AI to Further Supporting 3D Learning Progression.* Paper submitted to National Association of Research in Science Teaching (NARST). Seattle, WA.

PROJECTS

[2] Microsoft AI for Good: Adaptive Assessment System 2025 – present

Responsibilities include leading key technical initiatives such as system architecture design, frontend development, backend API implementation, data pipeline design, and cloud integration on Microsoft Azure for an AI powered adaptive assessment platform.

[1] National R&D: Meetings, Incentives, Conferences and Exhibitions Project 2022 - 2023

Planned and developed administrative and metaverse management dashboards, optimizing data management and integrating open-source technologies using Java, MySQL, and PostgreSQL.

LEADERSHIP & SERVICE

Undergraduate Student Director, Students Book Corporation 2024 – present

Industry Mentor Coordinator and Committee, Society of Women Engineers 2023 – 2025

Mentorship Program (TMP, Voiland Peer) 2023 – 2025
